

# Respond. Support. Recover

## Trauma-Informed Emergency Response Training Series

### Emergency Services, Medical & Hospital Focused Neurobiology of Trauma in Emergencies & Crisis Situations

May 27, 2024 | 9:00–10:00 AM EST (Lunch & Learn Intro)

Free Online Training

Respond. Support. Recover. Trauma-Informed Emergency Response Training Series Build your skills and confidence in supporting individuals and communities in crisis. Join our free online “Lunch & Learn” introductory sessions and advanced workshop, designed for professionals and students across emergency, health, and community sectors. Custom examples and interactive practice ensure sessions are enriching for all levels of experience. Advanced Training on June 9, 2024 | Full-Day Workshop (EMS Focused) Funded by the Government of Ontario. Offered at no cost to participants.

#### Who Should Attend

This training is ideal for anyone involved in crisis, emergency, or disaster response—including emergency management staff, regional service providers, healthcare professionals, community mental health workers etc. This training is suitable for experienced professionals and students in nursing, paramedicine, medicine, policing, and hospital-based roles.

#### What You'll Learn

- Understand how trauma and extreme stress impact neurobiology
- Recognize trauma responses and apply trauma-informed stabilization techniques
- Practical tools for supporting distressed individuals
- Custom clinical examples for hospital/EMS contexts
- Applied ITATM™ protocol trauma Integration for acute incidents
- Adapted trauma-informed interview techniques

#### Why You Should Attend

This training will strengthen your ability to assess trauma responses accurately, make informed decisions under pressure, and apply proven intervention strategies in real-world emergencies.

You'll develop a practical toolkit for stabilizing situations, supporting distressed individuals, and maintaining effective teamwork in high-stress environments.
